1. **LONG CASE (10 marks ................. 60 minutes)**

Each candidate will be allotted one long case and allowed 30 minutes for history taking and clinical examination. Candidates should take a careful history from the patient (or relative) and after a thorough physical examination identify the problems which the patient presents. During this period the candidate will be observed by the examiners.

Case presentation and discussion on the long case will be conducted jointly by two examiners for 30 minutes. In this section the candidates will be assessed on the following areas:

**Interviewing skills**
- Introduces one self, listens patiently, and is polite with the patient.
- Is able to extract relevant information.

**Clinical examinations skills**
- Takes informed consent.
- Uses correct clinical methods systematically (including appropriate exposure and redraping).
Case Presentation/Discussion

- Presents skillfully.
- Gives correct findings.
- Gives logical interpretation of findings
- Discusses differential diagnosis.
- Enumerates and justifies relevant investigation(s).
- Outlines and justifies treatment plan (including rehabilitation).
- Discusses prevention and prognosis.
- Has knowledge of recent advances relevant to the case.

During case discussion the candidates may ask the examiners for laboratory investigations which will be provided, if available. Even if they are not available and are relevant candidates will get the credit for the suggestion.

**SHORT CASES (10 marks)--- 40 minutes**

Candidates will be examined on at least four short cases for a total of 40 minutes jointly by the two examiners. Candidates will be given a specific task to perform on patients, one case at a time. Two minutes time is kept for changeover from one case to another.

Each candidate will be evaluated on a specific task assigned for completion in a specific time. The findings, their interpretation and a management plan (if required) will be presented to the examiners. During this part of examination the candidates will be assessed on his/her clinical skills, correctness of findings, interpretation of findings and ability to draw scientific conclusions.

**2. TOACS (10 marks)**

Task-Oriented Assessment of Clinical Skills (TOACS) will be held on the first day of the examination at the same time at all centres for all the candidates declared eligible for clinical part of the relevant examination. Candidates will be sent information regarding the schedule of TOACS by the Examination Department.

In the TOACS the candidates will be evaluated on procedures, x-rays, laboratory findings, instruments, specimens etc. This component of examination will consist of 10 to 18 stations, 4-8 minutes per station arranged in the examination hall and the candidates will have to rotate through all of them in turn. The TOACS stations will be of two types:

- Observed / Interactive
- Unobserved / Stand

In addition to the detailed instructions enclosed, the candidates will also receive verbal instructions at the time of the examination.

NOTE: The candidate are required to fill a self explanatory "feedback proforma" at the end of the examination.
DETAILED INSTRUCTIONS

1. Entry with admit card only.
   The candidates must display their admit cards on their white coats throughout the examination.

2. Response sheet:
   • Prior to entering the examination hall each candidate will be provided with a response sheet. Candidates must write their roll number on the response sheet before starting TOACS examination.
   • The candidate will only carry his/her response sheet while rotating through the stations. No other papers will be allowed in the examination hall.

3. The candidate is not supposed to remove any document or material from any station.

4. Each station will carry equal weightage. Every station must be attempted.

5. A specified time will be allotted at each station which will be signaled by a bell.

Conduct of Examination

1. The examination is in the form of a circuit. At the start the candidate would occupy the station allocated to him/her according to their roll number, and will move to the next station when the bell rings.

2. At these stations clear instructions would be written for performance of a task. The candidate is expected to read the instructions and act accordingly.

   On unobserved / static stations the candidate will be presented with a clinical case, laboratory data, x-ray, ultrasound, CT scan, instrument, specimen etc. and will be asked to give written responses to questions asked.

   In the observed / interactive stations the candidate will have to perform a procedure for example taking history, performing clinical examination, counseling, assembling an instrument etc. One examiner will be present at each such station who will either rate the performance of the candidate or ask questions testing the reasoning and problem-solving skills.

3. The performance of each candidate will be assessed by the examiners on a pre determined assessment form and the candidates will have to submit written responses to one-best / short answer questions in the response sheet.

4. Candidates will rotate through the stations in this way till they have completed the circuit. They will move only in one direction as displayed in the hall by arrow marks and will not be allowed to go back to the previous station.
